Bedrock Learning Intervention

Dear Parent/Carer,

I am writing to inform you about a new intervention taking place for our Year 11 students called **Bedrock Learning**. Bedrock Learning is a digital literacy programme designed to develop students' vocabulary and reading comprehension skills.

The programme adapts to each student's individual needs, providing tasks and challenges that respond to their current level and help them make steady progress. By engaging with Bedrock Learning, students will strengthen their language skills, which will support learning across all subjects and help them achieve their full potential in exams.

Students will complete regular activities as part of the programme, and their engagement and progress will be monitored in school. We encourage you to support your child in participating fully so they can benefit as much as possible from Bedrock Learning.

If you have any questions about the programme or how it will support your child's learning, please do not hesitate to contact us on 0121 783 7807.

Thank you for your continued support.

Yours faithfully,

C. Southern
